

Dashboard 1: Executive Overview

Dashboard Topic

Overall Restaurant Sales Performance

This dashboard provides a high-level overview of the restaurant's overall business performance by analyzing total orders, total revenue, average order value, customer satisfaction, sales trends, customer behavior, and branch performance.

The main purpose of this dashboard is to help managers and decision-makers monitor overall restaurant performance, identify sales trends, and evaluate customer ordering behavior across different branches.

Audience

- Restaurant Managers
 - Operations Managers
 - Branch Managers
 - Senior Management
 - Business Decision Makers
-

Business Questions

- How many completed orders were processed?
 - What is the total revenue generated?
 - What is the average order value?
 - What is the average customer rating?
 - Which months recorded the highest number of orders?
 - Which meal period generates the highest sales?
 - How are orders distributed across different dining types?
 - What is the distribution of new versus returning customers?
 - Which restaurant branch generates the highest sales?
 - How does daily sales performance change throughout the year?
-

Analysis Results and Answers

1. Total Number of Orders

A total of **19,009 completed orders** were recorded.

2. Total Revenue

The restaurant generated a total revenue of **5,861,128**.

3. Average Order Value

The average order value is approximately **308.33**.

4. Average Customer Rating

The average customer rating is approximately **3 out of 5**.

Overall customer satisfaction is moderate, suggesting opportunities to improve service quality and customer experience.

5. Orders by Month

The months with the highest number of completed orders are:

- March — **1,676 orders**
- August — **1,654 orders**
- July — **1,647 orders**
- October — **1,641 orders**
- December — **1,624 orders**

February recorded the lowest number of completed orders with **1,398 orders**.

6. Total Sales by Time Period

Sales are concentrated during the evening.

The meal periods are ranked as follows:

- Dinner — **2,939,600.75**
- Lunch — **2,050,366.50**
- Breakfast — **871,160.75**

Dinner generates nearly half of the restaurant's total revenue, making it the most important operating period.

7. Orders by Dine Type

Customers prefer eating inside the restaurant.

Order distribution:

- Dine In — **9,502 orders**
- Delivery — **5,775 orders**
- Takeaway — **3,732 orders**

Dine In represents the largest share of completed orders.

8. Customer Type Distribution

Returning customers account for the majority of restaurant orders.

Customer distribution:

- Returning Customers — **13,630**
- New Customers — **5,379**

Approximately **72%** of all completed orders come from returning customers, indicating strong customer loyalty.

9. Total Sales by Branch

Restaurant branches do not contribute equally to total sales.

Branch ranking:

- Downtown — **1,605,592.75**
- Mall Branch — **1,275,753.75**
- East Side — **1,018,298.75**
- West End — **793,045.00**
- Nasr City — **593,285.50**
- Airport — **575,152.25**

Downtown is the highest-performing branch, while Airport records the lowest revenue.

10. Daily Sales Trend

Daily revenue fluctuates throughout the year.

Several days exceed **24,000** in total sales, while most days generate between **13,000 and 19,000**.

Despite normal day-to-day fluctuations, the restaurant maintains relatively stable sales performance across the year without prolonged declines.

Key Business Insights

The Executive Overview dashboard reveals several important findings:

- The restaurant processed **19,009 completed orders** during the analysis period.
 - Total revenue reached **5.86 million**, demonstrating strong overall business performance.
